

# NURTENE

## PREPARATION FOR BREEDING SEASON

### Description

The nutritional intake of broodmares and stallions has been proven to affect their fertility.

### Purpose

NURTENE is a mineral feed formulated by AUDEVARD Laboratories. It is designed to provide additional nutrition to breeding horses (stallions and broodmares), before and during the breeding season.

### Formula

The NURTENE formula provides broodmares with over 15 concentrated nutrients, including beta-carotene.

### Our advice

NURTENE can also be recommended for stallions throughout the breeding season.

### Daily allowance

1 measure = 50g.

1 level measure per day for 6 weeks before covering.

A 2 kg pack of NURTENE is sufficient for daily use in the 6 weeks before covering.

### Professional format

2 kg box - (EAN 3515657547091). Sufficient for up to 6 weeks' use in adult horses.

6 kg box - (EAN 3515652632631). Sufficient for up to 18 weeks' use in adult horses.

12 kg barrel - (EAN 3515656665000). Sufficient for up to 34 weeks' use in adult horses

BREEDING

#### Composition for 1kg

##### Additives :

- **3a- Vitamins, provitamins and substances with analogous effect:** 3a890 choline (HCl) 35,000 mg, E160a β-carotene 5,600 mg, 3a314 niacin 3,500 mg, vitamin B1 1,000 mg, E672 vitamin A 1,700,000 IU, 3a700 vitamin E 8,000 IU.
- **3b- Trace elements:** E6 zinc (oxide) 10,000 mg, E5 manganese (oxide) 3,500 mg, E4 copper (sulphate) 1,000 mg, E2 iodine (calcium iodate) 120 mg, 3b302 cobalt (carbonate) 60 mg, E8 selenium (selenite) 18 mg.
- **3c- Amino acids:** 3c301 DL-methionine 60,000 mg

##### Raw materials:

Dicalcium phosphate, brewer's yeast, magnesium oxide, whey, sodium bicarbonate, sorbitol.

##### Analytical constituents:

Humidity < 10%, crude ash 49%, calcium 6%, phosphorous 6%, sodium 5%.

This product belongs to the mineral feed for horses category.

*N.B. This product contains cobalt. Please take protective measures to avoid exposure to cobalt through inhalation or contact with the skin*
